Please note this face shield is not intended to prevent specific diseases or infections. This shield has not undergone testing for resistance to bloodborne pathogens or other potentially infectious materials (OPIM). This face shield alone will not prevent infection from microbes or viruses, nor is it effective against radiation. The product has been authorized by the FDA under an EUA for use by healthcare providers as personal protective equipment. Face shields authorized by this EUA may be effective at preventing HCP exposure to certain particulates by providing minimal or low barrier HCP protection to the wearer. This product is only authorized for emergency use under Section 564(b)(1) of the Act, 21 USC 360bbb-3(b)(1). The face shield should not be used in the presence of high intensity heat source or flammable gas. Healthcare facilities are responsible for decisions regarding appropriate personal protective equipment for their personnel.
